

Gubernatorial Disaster Proclamation

WHEREAS, protecting the health and safety of Illinoisans is among the most important functions of State government; and,

WHEREAS, it is critical that Illinoisans who become sick are able to be treated by medical professionals, including when a hospital bed, emergency room bed, or ventilator is needed; and,

WHEREAS, it is also critical that the State's health care and first responder workforce has adequate personal protective equipment (PPE) to safely treat patients, respond to public health disasters, and prevent the spread of communicable diseases; and,

WHEREAS, Coronavirus Disease 2019 (COVID-19) is a novel severe acute respiratory illness that has spread among people through respiratory transmissions, the World Health Organization declared COVID-19 a Public Health Emergency of International Concern on January 30, 2020, and the United States Secretary of Health and Human Services declared that COVID-19 presents a public health emergency on January 27, 2020; and,

WHEREAS, on March 11, 2020, the World Health Organization characterized the COVID-19 outbreak as a pandemic, and has reported more than 3 million confirmed cases of COVID-19 and 200,000 deaths attributable to COVID-19 globally as of April 30, 2020; and,

WHEREAS, a vaccine or treatment is not currently available for COVID-19 and, on April 24, 2020, the World Health Organization warned that there is currently no evidence that people who have recovered from COVID-19 and have antibodies are protected from a second infection; and,

WHEREAS, despite efforts to contain COVID-19, the World Health Organization and the federal Centers for Disease Control and Prevention (CDC) indicated that the virus was expected to continue spreading and it has, in fact, continued to spread rapidly, resulting in the need for federal and State governments to take significant steps; and,

WHEREAS, on March 9, 2020, I, JB Pritzker, Governor of Illinois, declared all counties in the State of Illinois as a disaster area in response to the outbreak of COVID-19 (First Gubernatorial Disaster Proclamation); and,

WHEREAS, on March 13, 2020, the President declared a nationwide emergency pursuant to Section 501(b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, 42 U.S.C. 5121-5207 (the "Stafford Act"), covering all states and territories, including Illinois; and,

WHEREAS, on March 26, 2020, the President declared a major disaster in Illinois pursuant to Section 401 of the Stafford Act; and,

WHEREAS, on April 1, 2020, due to the exponential spread of COVID-19 in Illinois, I again declared all counties in the State of Illinois as a disaster area (Second Gubernatorial Disaster Proclamation); and,

WHEREAS, as circumstances surrounding COVID-19 rapidly evolve, there have been frequent changes in information and guidance from public health officials as a result of emerging evidence; and,

WHEREAS, from the outset, data suggested that older adults and those with serious underlying health conditions are more likely to experience severe and sometimes fatal complications from COVID-19; and,

WHEREAS, emerging evidence has shown that young people, including infants and toddlers, are also at risk for such complications; and,

WHEREAS, as of March 16, 2020, an analysis by the CDC showed that 38 percent of hospitalized COVID-19 patients were between the ages of 20 and 54, and there is evidence that COVID-19 causes blood clots and strokes, and has caused deadly strokes in young and middle-aged patients who exhibited few symptoms; and,

WHEREAS, the understanding on spread from infected individuals who have not shown symptoms has changed and, on April 12, 2020, the CDC changed the period of exposure risk from “onset of symptoms” to “48 hours before symptom onset”; and,

WHEREAS, previously, the CDC recommended against wearing cloth face coverings or masks as protection and, now, in light of new research on asymptomatic and pre-symptomatic transmission, the CDC now recommends wearing cloth face coverings in public settings where social distancing measures are difficult to maintain; and,

WHEREAS, as COVID-19 has spread in Illinois over the course of the Gubernatorial Disaster Proclamations, the circumstances causing a disaster throughout the State have changed; and,

WHEREAS, at the time I issued the First Gubernatorial Disaster Proclamation, there were 11 confirmed cases of COVID-19 in one Illinois county; and,

WHEREAS, as of today, April 30, 2020, there have been nearly 53,000 confirmed cases of COVID-19 in 97 Illinois counties; and,

WHEREAS, the first death attributed to COVID-19 in Illinois was announced on March 17, 2020; and,

WHEREAS, as of April 30, 2020, Illinois has had more than 2,350 deaths resulting from COVID-19, including 141 deaths reported over a 24-hour period on April 30; and,

WHEREAS, studies suggest that for every confirmed case there are many more unknown cases, some of which are asymptomatic individuals, meaning that individuals can pass the virus to others without knowing; and,

WHEREAS, the Illinois Department of Public Health activated its Illinois Emergency Operations Plan and its Emergency Support Function 8 Plan to coordinate emergency response efforts by hospitals, local health departments, and emergency management systems in order to avoid a surge hospital resources and capacity; and,

WHEREAS, as the virus has progressed through Illinois, the crisis facing the State has developed and now requires an evolving response to ensure hospitals, health care professionals and first responders are able to meet the health care needs of all Illinoisans and in a manner consistent with CDC guidance that continues to be updated; and,

WHEREAS, in order to ensure that health care professionals, first responders, hospitals and other facilities are able to meet the health care needs of all residents of Illinois, the State must have critical supplies, including PPE, such as masks, face shields, gowns, and gloves; and,

WHEREAS, the State of Illinois maintains a stockpile that supports the existing PPE supply chains and stocks at various healthcare facilities; and,

WHEREAS, across the State, hospitals and long-term care facilities use approximately 1.5 million N95 masks, 25 million gloves, 4.4 million gowns, and 700,000 surgical masks during a 10-day period; and,

WHEREAS, the State had distributed among all 102 Illinois counties millions of surgical masks and N95 masks, tens of thousands of gowns, millions of pairs of gloves, and hundreds of thousands of face shields from the State stockpile; and,

WHEREAS, the Illinois Department of Public Health has provided guidance to all hospitals and EMS providers recommending the immediate elevation of their conservation and contingency strategies as it relates to PPE; and,

WHEREAS, while the State is making every effort to procure additional PPE, if those procurement efforts are disrupted or Illinois experiences a surge in COVID-19 cases, the State faces a life-threatening shortage of respirators, masks, protective eyewear, face shields, gloves, gowns, and other protective equipment for health care workers and first responders; and,

WHEREAS, Illinois is using a high percentage of hospital beds, ICU beds, and ventilators as a result of the number of COVID-19 patients that require hospitalization and, if cases were to surge higher, the State would face a shortage of these critical health care resources; and,

WHEREAS, Illinois currently has a total of 32,010 hospital beds with 3,631 ICU beds, of which, as of April 30, 2020, only 33% of hospital beds and 25% of ICU beds were available statewide, and only 17% of ICU beds were available in the Chicago region; and,

WHEREAS, the State worked with top researchers from the University of Illinois at Urbana-Champaign, the Northwestern School of Medicine, the University of Chicago, the Chicago and Illinois Departments of Public Health, along with McKinsey and Mier Consulting Group, and Civis Analytics, to analyze two months' worth of daily data on COVID-19 deaths and ICU usage and model potential outcomes; and,

WHEREAS, the State's modeling shows that its health care resource utilization will not peak until May, and that health care resources will continue to be limited after the peak; and,

WHEREAS, the State's modeling shows that without extensive social distancing and other precautions, the State will not have sufficient hospital beds, ICU beds or ventilators; and,

WHEREAS, Illinois currently has a total of 32,010 hospital beds, and the State's modeling shows that without a "stay at home" order, more than 100,000 hospital beds would be necessary; and,

WHEREAS, Illinois currently has a total of 3,631 ICU beds, and the State's modeling shows that without a "stay at home" order, more than 25,000 ICU beds would be necessary; and,

WHEREAS, Illinois currently has a total of 3,378 ventilators, and the State's modeling shows that without a "stay at home" order, upwards of 20,000 ventilators would be necessary; and,

WHEREAS, the State's modeling shows that without a "stay at home" order, the number of deaths from COVID-19 would be between 10 to 20 times higher than with a "stay at home" order in place; and,

WHEREAS, the epidemiology concept of R_0 (R-naught) – which represents the number of cases, on average, an infected person will cause during their infectious period – is an important measure of progress in combatting a virus like COVID-19, and that an R_0 of below 1 is a critical milestone because it suggests that the disease is declining rather than spreading; and,

WHEREAS, the State's estimated effective R_0 was approximately 3.5 at the beginning of the outbreak, but the number has improved to approximately 1.25 based on the State's emergency measures, including the "stay at home" order; and,

WHEREAS, hospital beds, ICU beds, and ventilators are needed not for just patients with COVID-19, but also for any number of additional illnesses and injuries; and,

WHEREAS, fewer Illinoisans have sought non-COVID-19 related medical care and emergency care in recent weeks and it is critical that Illinoisans are able to and willing to seek non-COVID-19 related medical care and emergency care; and,

WHEREAS, Illinoisans will be able to and willing to seek non-COVID-19 related medical care and emergency care if there are sufficient hospital beds, ventilators, and if medical personnel are able to protect themselves with PPE; and,

WHEREAS, the State has been limited in the number of COVID-19 tests that can be taken and processed due to a limited number of testing sites and labs, as well as a shortage of necessary supplies, including the swabs needed to take samples; and,

WHEREAS, at the time I issued the First Gubernatorial Disaster Proclamation, Illinois had capacity to test no more than a few hundred people per day for COVID-19 at a small number of testing sites; and,

WHEREAS, the State has developed testing sites throughout the State and now has increased the COVID-19 tests per day to more than 10,000; and,

WHEREAS, as of April 30, 2020, Illinois has tested nearly 270,000 total specimens for COVID-19; and,

WHEREAS, national projections adjusted for Illinois' population suggest the state may need to process several thousand more tests per day as part of the effort to permanently slow and reduce the spread of COVID-19; and,

WHEREAS, the World Health Organization has identified a positive test rate of 10% as a benchmark for adequate testing but currently over 20% of the COVID-19 tests administered in Illinois have positive results, suggesting that Illinois must continue increasing testing; and,

WHEREAS, based on the foregoing facts, and considering the expected continuing spread of COVID-19 and the resulting health impacts that will be felt over the coming month by people across the State, the current circumstances in Illinois surrounding the spread of COVID-19 constitute an epidemic emergency and a public health emergency under Section 4 of the Illinois Emergency Management Agency Act; and,

WHEREAS, based on the foregoing, the new circumstances surrounding the threatened shortages of hospital beds, ICU beds, ventilators, and PPE, and critical need for increased COVID-19 testing capacity constitute a public health emergency under Section 4 of the Illinois Emergency Management Agency Act; and,

WHEREAS, it is the policy of the State of Illinois that the State will be prepared to address any disasters and, therefore, it is necessary and appropriate to make additional State resources available to ensure that that our healthcare delivery system is capable of serving those who are sick and that Illinoisans remain safe and secure and able to obtain medical care; and,

WHEREAS, this proclamation will assist Illinois agencies in coordinating State and Federal resources, including materials needed to test for COVID-19, personal protective equipment, and medicines, in an effort to support the State responses as well as the responses of local governments to the present public health emergency; and,

WHEREAS, these conditions provide legal justification under Section 7 of the Illinois Emergency Management Agency Act for the new issuance of a proclamation of disaster; and,

WHEREAS, the Illinois Constitution, in Article V, Section 8, provides that "the Governor shall have the supreme executive power, and shall be responsible for the faithful execution of the laws," and states, in the Preamble, that a central purpose of the Illinois Constitution is "provide for the health, safety, and welfare of the people";

NOW, THEREFORE, in the interest of aiding the people of Illinois and the local governments responsible for ensuring public health and safety, I, JB Pritzker, Governor of the State of Illinois, hereby proclaim as follows:

Section 1. Pursuant to the provisions of Section 7 of the Illinois Emergency Management Agency Act, 20 ILCS 3305/7, I find that a disaster exists within the State of Illinois and specifically declare all counties in the State of Illinois as a disaster area. The proclamation authorizes the exercise of all of the emergency powers provided in Section 7 of the Illinois Emergency Management Agency Act, 20 ILCS 3305/7, including but not limited to those specific emergency powers set forth below.

Section 2. The Illinois Department of Public Health and the Illinois Emergency Management Agency are directed to coordinate with each other with respect to planning for and responding to the present public health emergency.

Section 3. The Illinois Department of Public Health is further directed to cooperate with the Governor, other State agencies and local authorities, including local public health authorities, in the development and implementation of strategies and plans to protect the public health in connection with the present public health emergency.

Section 4. The Illinois Emergency Management Agency is directed to implement the State Emergency Operations Plan to coordinate State resources to support local governments in disaster response and recovery operations.

Section 5. To aid with emergency purchases necessary for response and other emergency powers as authorized by the Illinois Emergency Management Agency Act, the provisions of the Illinois Procurement Code that would in any way prevent, hinder or delay necessary action in coping with the disaster are suspended to the extent they are not required by federal law. If necessary, and in accordance with Section 7(1) of the Illinois Emergency Management Agency Act, 20 ILCS 3305/7(1), the Governor may take appropriate executive action to suspend additional statutes, orders, rules, and regulations.

Section 6. Pursuant to Section 7(3) of the Illinois Emergency Management Agency Act, 20 ILCS 3305/7(3), this proclamation activates the Governor's authority, as necessary, to transfer the direction, personnel or functions of State departments and agencies or units thereof for the purpose of performing or facilitating emergency response programs.

Section 7. The Illinois Department of Public Health, Illinois Department of Insurance and the Illinois Department of Healthcare and Family Services are directed to recommend, and, as appropriate, take necessary actions to ensure expanded access to testing for COVID-19 and that consumers do not face financial barriers in accessing diagnostic testing and treatment services for COVID-19.

Section 8. The Illinois State Board of Education is directed to recommend, and, as appropriate, take necessary actions to address any impact to learning associated with the present public health emergency and to alleviate any barriers to the use of remote learning during the effect of this proclamation that exist in the Illinois School Code, 105 ILCS 5/1-1 et. seq.

Section 9. All State agencies are directed to cooperate with the Governor, other State agencies and local authorities in the development and implementation of strategies and plans to cope with and recover from the economic impact of the present public health emergency.

Section 10. Pursuant to Section 7(14) of the Illinois Emergency Management Agency Act, 20 ILCS 3305/7(14), increases in the selling price of goods or services, including medical supplies, protective equipment, medications and other commodities intended to assist in the prevention of or treatment and recovery of COVID-19, shall be prohibited in the State of Illinois while this proclamation is in effect.

Section 11. This proclamation can facilitate requests for federal emergency and/or disaster assistance if a complete and comprehensive assessment of damage indicates that effective recovery is beyond the capabilities of the State and affected local governments.

Section 12. This proclamation shall be effective immediately and remain in effect for 30 days.

In Witness Whereof, I have hereunto set my hand and caused the Great Seal of the State of Illinois to be affixed.

*Done at the Capitol in the City of
Springfield this 30th day of April in the
Year of Our Lord two thousand and
twenty, and of the State of Illinois two
hundred and second.*

Deese White
SECRETARY OF STATE

BRB
GOVERNOR
